

# Extensive Lawn Care Treatments

## Premium Lawn Care Package

*(pricing determined by size of lawn area & service agreement)*

**EARLY SPRING FERTILIZER AND CRABGRASS PREVENTATIVE:** Applied in early Spring this helps provide your lawn with much needed nutrients to help green-up lawns & Crabgrass preventative to keep Crabgrass from germinating. (March - April) Starts \$45 per application.

**MID-SPRING FERTILIZER & BROADLEAF WEED CONTROL:** Applied in mid-Spring, this application again gives lawns a good dose of nutrients plus broadleaf weed control for Dandelions, Clover, Chickweed and most other broadleaf weeds. (May) Starts \$45 per application.

**LATE SPRING FERTILIZER PLUS GRUB CONTROL:** Applied in late May & early June this again provides nutrients for lawn before the hot Summer weather sets in as well as a preventative Grub control just as Grubs, Webworms and Chinch bugs start to surface in lawns root systems. (late May - mid June) Starts \$45 per application.

**MID-SUMMER DISEASE CONTROL:** During the hot Summer months of July & August your lawn can become susceptible to various lawn diseases due to the damp, humid conditions. This treatment helps eradicate any diseases that start to appear. **IMPORTANT REMINDER! DO NOT WATER AT NIGHT.** This tends to promote fungus development in lawns. (July - August) Starts \$45 per app.

**LATE SUMMER FERTILIZER & GRUB CONTROL:** An excellent time to feed the lawn is later in the summer and at the same time we put down some more Grub control in case late season Grubs appear. (late August - September) Starts \$45 per application.

**MID-FALL FERTILIZER & BROADLEAF WEED CONTROL:** Applied mid Fall this gives lawns a final feeding heading into the Winter as well as a final broadleaf weed clean-up. (Oct-Nov) Starts \$45 per app.

**LATE FALL FERTILIZER & CRABGRASS PREVENTATIVE:** Applied late Fall this provides your lawn with an excellent slow release fertilizer which helps green up your lawn for early next Spring, as well as providing late Fall nutrients and Crabgrass prevention. (November - December) Starts \$45 per app.

**SPRING/FALL PELLETIZED LIME:** This is one of the most important optional treatments to consider because this will help balance the soil's PH so that fertilizers will work more efficiently. (April - May/ September - October) Starts \$45 per application.

## Optional Lawn & Ground Care Services

**MOSQUITO, TICK, & FLEA CONTROL:** These are monthly sprays for the control of ground insects such as Ticks, Fleas and adult Mosquitos, Bees, Spiders, Hornets, Flies, Wasps, Earwigs, etc. (April - October) Starts \$60 per application.

**ANT CONTROL (MAX FORCE GRANULAR):** A superior ant control bait that controls many types of ants including Carpenter Ants, Red Army Ants, Sugar Ants, etc. It is conveniently stored in a reusable container so it can be used whenever any problem arises. Starts \$60 per application.

**(Continued)**

**SPRING & SUMMER POISON IVY CONTROL:** This application is a foliar spray applied to the broadleaf weed. It will burn the plant down to the root. Excellent in controlling Poison Ivy, Poison Oak and Sumac. (Applied Spring, Summer, and Fall) Starts \$60 per application.

**DAMMINEX LYME DISEASE TICK CONTROL:** This is a non-spray tick controller that kills Ticks at their source, which is the nesting area of animals such as Field Mice, Squirrels, Raccoons and Birds. These six inch cardboard Damminex tubes filled are with cotton treated with a product called Permethrin, which is the most effective Lyme Disease tick control product on the market when placed in wooded areas. Permethrin is odorless and the sticky cotton will attract animals like Mice, Squirrels, Raccoons, and Birds to use as a nesting tool. It will then actively kill all Ticks on the animal's fur or feathers and destroy the tick eggs in the nesting area without harming the host animal. (Applied April - October) Starts \$60 per application.
